

ABDULLAH AL ZUNAYED MARUF

ANDROID APPLICATION PENTESTER | SECURITY RESEARCHER | BUG BOUNTY HUNTER

amast.maruf@gmail.com | linkedin.com/in/abdullah-al-zunayed-maruf | Dhaka, Bangladesh

PROFILE

Android Application Pentester, Bug Bounty Hunter, and Security Researcher with practical experience in mobile application security. Currently working as a Jr. Mobile Application Security Analyst (Intern) at Byte Capsule, with hands-on experience in static and dynamic analysis, API security testing, Android component testing, and vulnerability validation.

EXPERIENCE

Jr. Mobile Application Security Analyst (Intern)

Byte Capsule

Oct 2026 – Present

- Perform static and dynamic security analysis of Android applications.
- Conduct API and Android component security testing.
- Validate findings through practical testing and proof-of-concept verification.

PROJECTS

Android Vulnerability Assessment

- Tested **AndroGoat**, **InsecureShop**, **Hopenity**, **Shopify**, and **AllSafe** across common Android and mobile application attack surfaces.
- Checked **IPC**, **exported components**, **insecure data storage**, **authentication/access control**, **WebView & deep-link security**, **network/TLS controls**, **hardcoded secrets**, **cryptography**, **logging**, and **input validation**.
- Performed static and dynamic analysis with ADB, Frida, Burp Suite, and reverse-engineering techniques to validate findings.

CERTIFICATION

Advanced Mobile Application Security Testing

Byte Capsule

Certification ID: CFI41BJO9K
